Leadership in the quality of teaching and learning Development of institutional capacity

Elevating the level of the infrastructure e of the college

Excellence in support of student learning services

Raising the participation and the quality of community Services level

Advancement of applied scientific research

Strategic Plan College of Engineering 1433-1440H 2012-2019

Strategic Plan College of Engineering

6 Themes

11 Goals

30 Objectives

Themes 1. The development of the institutional capacity of the College 2. Achieve leadership in the quality of teaching and learning at the national and global level and and global level and and global level and the national and global level and substitute and financial policies to achieve the world class keyel 4. Elevating the level of the infrastructure of the college and processes in the college and better use of university facilities and student support services 5. Excellence in support of student services and student support services and student services of the college support services and student services and support services and support services	College of Engineering		
thought of the College 2. Academic and administrative restructuring 3. Consolidate the concept of quality in all of college events to achieve headership in the quality of teaching and learning at the national and global level 3. Excellence in support of student learning services 4. Elevating the level of the infrastructure of the college and better use of university facilities the first ructure of the college and place quality and the administrative and financial policies to achieve he help level of quality 5. Excellence in support of student learning services 6. Enhance learning resources to an first ructure of the college and better use of university facilities the first ructure of the college and promote better use of university facilities 8. Develop mean and units of the college facilities to achieve the world class level 9. Development and facilities for the college and place and financial policies to achieve a high level of quality 9. Development and facilities or recruitment mechanisms 10. Develop and improve recruitment mechanisms 11. Strengthen the relationship with the community services contributed by the college to build a knowledge-based society 12. Cradate mechanisms of vision, mission and goals 13. Update the organizational structure of the college and academic and administrative units 14. Preparation of job descriptions and responsibilities 15. Develop mechanisms to assess and evaluate the performance of all units and departments and staff at the college 16. Develop mechanisms to assess and evaluate the performance of the college 16. Develop mechanisms to assess and evaluate the performance of the college in the tea addenic programs and units of the college to achieve the endities of the college of a chieve the world class level of the achieve on the world class level of the achieve on the world class level of the college and promote better use of university facilities 15. Evelence in support of the college and promote better use of university facilities 16. Ephanical policies			
2. Achieve leadership in the quality of teaching and learning at the national and global level 3. Excellence in support of student learning services 4. Elevating the level of the infrastructure of the college and better use of university facilities 5. Develop predictions and responsibilities 7. Development and financial policies to achieve a high level of quality of teaching and learning at the national and global level 4. Elevating the level of the infrastructure of the college and better use of university facilities 8. Develop the administrative and financial policies to achieve a high level of quality 9. Developing and improve recruitment mechanisms 5. Advancement of applied scientific research to contribute to comprehensive and and the quality of community services contributed by the college to build a knowledge-based society 4. Freparation of job descriptions of pole despination of job descriptions and responsibilities 4. Preparation of job descriptions of a development and evelopment and evelopment to achieve the college of the college of achieve international quality standards 8. Preparation of the academic programs and units of the college to achieve international quality standards 8. Preparation of the academic programs for national and international accreditation 9. Development and facilities of the academic programs and units of the college of facility members 11. Expansion in student activities and identified according to the desire of students 12. Development and international accreditation 9. Activation of Academic Programs in definition of Academic programs in the college 13. Expansion in student activities and identified according to the desire of students 12. Development and international activation of academic programs in the college 13. Expansion in student activities and identified according to the desire of students 12. Devel			
restructuring 3. Consolidate the concept of quality in all of college events 2. Achieve leadership in the quality of teaching and learning at the national and global level 3. Excellence in support of student learning services 4. Excellence in support of student learning services 5. Excellence in student activities and student support services 6. Enhance learning resources to achieve the world class level 4. Elevating the level of the infrastructure of the college and promote better use of university facilities 8. Develop the administrative and financial policies to achieve a high level of quality 9. Developing and improve recruitment mechanisms 5. Advancement of applied scientific research to contribute to comprehensive and sustainable development of graduate programs support of student support services of nuriversity facilities 6. Raise the level of participation and the quality of community services contributed by the college to build a knowledge-based society 4. Tupor academic programs and evaluate the performance of all units and departments and staff at the college 6. Develop mechanisms to assess and evaluate the performance of all units and departments and staff at the college 6. Develop mechanisms to assess and evaluate the performance of all units and departments and staff at the college 7. Update the academic programs and units of the college to Achieve international quality 8. Preparation of the academic programs for national and international quality 8. Preparation of the academic programs for national and international quality 11. Expansion in student activities and identified according to the desire of students 12. Expansion in student activities and identified according to the desire of students 13. Expansion of the Learning Resources Services 14. Continuous updating of equipment and facilities of the college 15. Development and activation of incentive systems 16. Update the administrative regulations and instructions for the college 17. Update development and activation of	institutional capacity of the	thought of the College	2. Update the mechanism of vision, mission and goals
3. Consolidate the concept of quality in all of college events	College	2. Academic and administrative	3. Update the organizational structure of the college and academic and administrative units
2. Achieve leadership in the quality of teaching and learning at the national and global level at the national and global level and the national and global level as Evellence in support of student learning services and student learning resources to achieve the world class level and student support services of the infrastructure of the college and promote better use of university facilities better use of university facilities and infinacial policies to achieve a high level of quality processes and evaluate all educational processes in the college of a chieve international quality standards and student support services of Excellence in student activities and student support services of Expansion of the academic programs and units of the college to achieve international quality standards and student support services of Excellence in student activities and student activities and identified according to the desire of students and improvement of learning resources and improvement of learning resources of the college and promote better use of university facilities and finacial policies to achieve a high level of quality processes in the college of C. Development and adequacy of faculty members of Advising and update guidance regulations and international accreditation of Academic Advising and update guidance regulations and improvement of learning resources and improvement of the college and promote better use of university facilities and promote better use of university facilities and promote better use of university facilities and ministrative and finacial policies to achieve a high level of quality facilities and promote better use of university facilities and promote better use of uni		restructuring	4. Preparation of job descriptions and responsibilities
A. Achieve leadership in the quality of teaching and learning at the national and global level to achieve leadership at the national and global level to achieve leadership at the national and global level to achieve leadership at the national and global level to achieve leadership at the national and global level to achieve leadership at the national and global level to achieve international quality of teaching and learning acreditation of the academic programs for national and international acreditation of the academic programs for national and international acreditation of the academic programs for national and international acreditation of the college and global level of the infrastructure of the college and better use of university facilities and student support services of achieve the world class level of the college and promote better use of university facilities and financial policies to achieve a high level of quality and financial policies to achieve a high level of quality and scientific research to contribute to comprehensive and sustainable development of graduate programs in the college strategic plan for scientific research and the development of graduate programs in the college strategic plan for scientific research and the development of graduate programs in the college strategic plan for scientific research units and center of scientific research units and center o		3. Consolidate the concept of	5. Develop mechanisms to assess and evaluate the performance of all units and departments and
2. Achieve leadership in the quality of teaching and learning at the national and global level and sudent learning services 3. Excellence in support of student learning services at udent learning services 4.
